

# C40 Cities MAKE A DIFFERENCE

Each city in the C40 is unique in its infrastructure and progress in addressing climate change. C40 works to empower cities to connect with each other and share technical expertise on best practices.

Each year, C40 surveys the [Mayoral Powers](#) of its member cities in order to understand where the greatest opportunities exist to advance specific climate actions and foster targeted knowledge sharing. The chart below reflects a summary of current Mayoral Powers by area, each of which is served by a C40 Initiative and its topical [Networks](#). Cities whose mayors possessed strong or partial power over two-thirds of surveyed assets and functions in each category are indicated below. Cities who identified a climate action plan to C40 are also indicated in the Measurement and Planning category. Explore Mayoral Powers in C40 Cities below, or view an [infographic](#) to learn [why ending climate change begins in cities](#).
